

BACCALAURÉAT PROFESSIONNEL SECTIONS EUROPÉENNES
ACADÉMIE DE GRENOBLE SESSION : 2026
ÉPREUVE ORALE SPÉCIFIQUE : ANGLAIS
FILIÈRE : INDUSTRIELLE

Partie A – 10 minutes (Expression orale en continu) (*A partir du sujet ci-dessous*)

Partie B – 10 minutes (Expression orale en interaction)

(*Travaux, activités effectuées dans l'année terminale, dans la discipline non linguistique et ouverture européenne*)

Durée de préparation : 20 minutes

Durée de passage : 20 minutes

SUJET :

Drone workshop

Situation:

You are an electronic technician in a workshop firm in Latvia. The company LDE was founded in 2016 and it built and repaired civil drone (UAV) mainly for the construction sites. Nowadays the company works more and more for military drone as the market is quickly growing.

The CEO wants to find new investment to increase the production of drones.

*UAV : Unmanned Aerial Vehicle (drone)

Your tasks:

1. Present yourself and your job.
2. Present some uses of UAV. (Annex 1)
3. Present the three recommendations to fly a drone in EU. (Annex 2)
4. Explain the main characteristic of military drones. (Annex 3)
5. Look at the table, annex 4, explain why our UAV are the best.

Most common drone uses

OPERATING A DRONE FOR FUN

What do I need to know if I have a Drone in Class 0, 1, 3 or 4

Get registered

1. Buy a drone and check its requirements. They can differ in the different drone classes
2. Register online at your National Aviation Authority's website
3. Get an operator registration
4. Attach the operator's registration number to the drone and upload it to the remote ID system

Train to be a good pilot

5. Train and pass the exam on your National Aviation Authority's website
6. Get the remote pilot certificate

Prepare for every flight

7. Check where you can fly and for any other flying limitations on your National Aviation Authority's website
8. Read the drone's manual and prepare your drone for every flight
9. Respect the limitations of the open category
10. Enjoy and fly safely and responsibly. You are the pilot!

Annex 3: Army Drone: What It Is

What Is an Army Drone?

An military drone is an unmanned aerial vehicle used by the military for surveillance, reconnaissance, monitoring, logistics, and support operations without a human pilot onboard.

Military drones are controlled remotely by trained operators or operate using pre-programmed flight paths supported by onboard sensors and software. Their primary goal is to provide real-time situational awareness and operational support.

Military Drone vs Civilian Drone

While civilian drones are used for photography, agriculture, mapping, and inspections, army drones differ in several ways:

- Longer flight endurance
- Secure, encrypted communication systems
- Specialized sensors (thermal, night vision, radar)
- Designed for high-risk or remote environments

These differences make army drones suitable for continuous monitoring and mission-critical tasks.

Drones Comparison Table

	HEIFU - BVH615	HEIFU Pro - BVH616	BVT516	BVQ418
Manufacturer	HEIFU  BEYOND VISION	HEIFU  BEYOND VISION	LDE (Our company) 	LDE (Our company) 
Class (EU Reg.2019/945)	3	3	3	3
Type	Hexacopter	Hexacopter	Hexacopter	Quadcopter
Dimensions (length x width x height)	1500 x 1500 x 600 mm	1550 x 1550 x 600 mm	1600 x 2990 x 750 mm	1700 x 1700 x 600 mm
Mass	5 kg	6 kg	8.5 kg	5kg
Payload weight	6 kg	3.5 kg	2 kg	7 kg
Maximum speed	100 km/h	80 km/h	120 km/h	80 km/h
Autonomy	30 min	60 min	150 min	90 min
SSD		256/512 GB (optional)	256/512 GB	256/512 GB
Interfaces for peripherals	USB 2.0, Ethernet, SPI, I2C, CAN	USB 2.0, Ethernet, SPI, I2C, CAN	USB 2.0, Ethernet, SPI, I2C, CAN,	USB 2.0, Ethernet, UART, I2C, CAN
Maximum sound level	99 dB	99 dB	100 dB	99 dB
Default Radio distance	12 km (EU) 16 km (US)	12 km (EU) 16 km (US)	12 km (EU) 16 km (US)	12 km (EU) 16 km (US)
Operating temperature	-10°C/+55°C	-10°C/+55°C	-10°C/+55°C	-10°C/+55°C
